DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 15-21,23,24,26-39,48-56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hansen et al (Synthesis and characterization of pyrourite, Applied Clay Science vol. 10, 1995, pp.5-19). Hansen teaches a composition comprising pyrourite [Mg-Fe (OH)(CO3)], which is free of aluminum. Hansen discloses the instant ratio of Mg to Fe in pyrourite compounds. See Table 1 and 2. Since Hansen teaches the same pyrourite [Mg-Fe (OH) (CO3)] compounds as being instantly claimed, it is apparent that identical compounds would posses same chemical and physical properties including phosphate binding capacity. Hansen teaches a number of uses for the Mg-Fe compound including water purification, host for nutrients, hormonal and pesticidal. Of these uses, host for nutrients can be considered a pharmaceutical application. It would have been obvious to one having ordinary skill in the art to employ pyrourite compounds to host nutrients. One would have been motivated to do this because Hansen suggests this use.

Election Status / Allowable Subject Matter

Claims 43-47 are allowable. The prior art does not teach or suggest the instant method of treating hyperphospataemia with instant Fe-metal compounds. The elected

pharmaceutical composition comprising pyrourite [Mg-Fe (OH)(CO3)] is not allowable. See art rejection above.

Telephonic Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alton N. Pryor whose telephone number is 571-272-0621. The examiner can normally be reached on 8:00 a.m. - 4:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
